

The Utica Heating 15B Series Boiler is an Affordable Gas-Fired Home Heating Solution with Built-In LWCO Protection

FEATURES

■ **Quality Heat Exchanger Design –**

The 15B Series features a dependable cast iron heat exchanger with cast iron push nipples. The sections and push nipples expand at the same rate when heated. By using similar materials instead of less expensive gaskets, or steel push nipples, the boiler maintains a water tight seal.

■ **Efficiency –**

The 15B Series provides an annual fuel utilization efficiency of 82% as certified by the US Department of Energy.

■ **Easy Installation and Maintenance –**

The 15B Series features a Low Profile Draft Hood and Vent Damper. The low profile, compact design makes it ideal for low clearance installations.

■ **Operating Controls –**

- Honeywell control, with digital display and diagnostics, monitors water temperature and delays burner from starting until the residual heat energy within the boiler is consumed.
- Built-in low water cut-off (LWCO) to protect the boiler from potentially dangerous low water conditions.

■ **Residential Warranty –**

20 Year Limited Heat Exchanger Warranty,
1 Year Limited Component Parts

STANDARD EQUIPMENT:

- Boiler Jacket / Burner Enclosure
- LWCO
- Cast-Iron Boiler Battery
- High Limit Control
- Intermittent Electronic Ignition Pilot System
- Vent Damper Relay
- Main Gas Burners
- Combination Gas Control includes:
 - Automatic Gas Valve
 - Gas Pressure Regulator
 - Intermittent Pilot
 - Safety Shut Off
 - Pilot Flow Adjustment
 - Pilot Filter
- A.S.M.E. Relief Valve
- Drain Valve
- Spill Switch
- Rollout Switch
- Automatic Vent Damper
- Wiring Harness
- Non-Linting Safety Pilot

OPTIONAL:

- Propane Option Available
- Central Heating Pump: Taco, Grundfos or Less Pump

C.S.A Certified For
Natural Gas or Propane

Tested for 100 psi. ASME
Working Pressure

(1) Input rating for sea level to 2,000 ft. (610m) above sea level. United States, over 2000 ft (610m) above sea level. Reduce input rate 4% for every 1,000 ft (304m) above sea level.

(2) Net AHRI Water Ratings shown based on piping and pickup allowance of 1.15. Consult manufacturer before selecting boiler for installations having unusual piping and pickup requirements, such as intermittent system operation, extensive piping systems, etc. For forced hot water systems where boiler and all piping within area to be heated, boiler may be selected on basis of its heating capacity.

(3) Tank sized for non-ferrous baseboard or radiant panel systems. Increase size for cast iron baseboard and radiation.
